

# The MIL Button

If you are a Military Reservist or a National Guard member and take Military Leave of Absence (MILOA) from time to time, you will find the following WBidMax feature to be of interest.

Specifically, WBidMax on the PC, iPad or Mac will now adjust the lines for your planned MILOA. Using this feature will allow you to bid for Max Pay, Max Days Off, Largest Block of Days OFF, or however your personal quality of life (QOL) requires.

First, the MIL button is NOT displayed automatically. You will have to go to Miscellaneous => Configure and then User tab to turn on the MIL button display. It looks like this in version 5 (PC). In the Mac and the iPad, the concept is the same. Go to Misc=>Configuration and the user tab.

After turning on the MIL button, you will notice the MIL button on the toolbar. This same process will exist in the iPad and the MAC. The MIL feature is NOT in WBid Classic or WBidMax version 4.

BWI/CP/737 Monthly Line for March 2015 ( 19 of 515 )

File View CSW Miscellaneous Help New-Help-Videos

MIL OVR VAC DRP EOM CSW QS

Ord	Line	MyValue	Wts	Pay	WkEnd	A/P	Off	T234	Flt	+Off	PDiem	VacPay	Vofrnt
1	66	52.17	4.0	90.07	WKEND	AM	19	0003	77:10	10	246:00	0.00	0.00
2	363	96.00	1.0	111.80	WKEND	PM	16	0050	92:00	4	284:45	0.00	0.00
3	365	98.21	4.0	111.67	WKEND	PM	16	0050	91:20	4	280:10	0.00	0.00
4	172	80.43	4.0	96.73	WKEND	AM	17	0022	79:20	6	271:35	0.00	0.00
5	173	78.98	4.0	96.72	WKEND	AM	17	0022	82:05	6	265:45	0.00	0.00
6	170	70.08	4.0	96.08	WKEND	AM	17	0022	79:20	6	271:35	0.00	0.00

To set a MILOA, click or touch the MIL button, and the following dialog will appear:

MIL Date Selection View

Start Date End Date

03/01/2015 00:00 03/01/2015 00:00

Calculate Cancel

The Start Date and End Date drop down boxes will display a combined calendar picker and time picker for you to quickly set your MILOA start and end date and times.

Note, the time picker is at the bottom of the calendar picker.

00:00

00:00

01:00

02:00

03:00

04:00

Additionally, if you have more than one MILOA in a month, you can set multiple MILOA periods (up to 4 total). Just click the green + sign to add an additional MILOA period.

Shown below is a MILOA set for Apr 7<sup>th</sup> starting at 09:00 AM Herb, and ending on the 10<sup>th</sup> at 12:00 PM Herb.

MIL Date Selection View

Start Date: 04/07/2015 09:00

End Date: 04/10/2015 12:00

Calculate Cancel

Now, with the MILOA start and end date and times set, just click on “Calculate” and the lines will be corrected for your MILOA. The Pay, Days Off, Largest Block of Days Off etc will update and you can then sort or max pay or max days off, or whatever your personal QOL is looking for.

Here is the Modern View with the MIL button on (orange), and the MIL corrected trip on 10 - 11 Apr in Line 7. Note the trip is split at the pass through domicile (SIP on the 10<sup>th</sup>).

WBidMax will look at your input MILOA and then remove all conflicted trips while also considering SIPs and dead heading to or from a split-point city (< 1.6 tfp).

## QOL Bidding

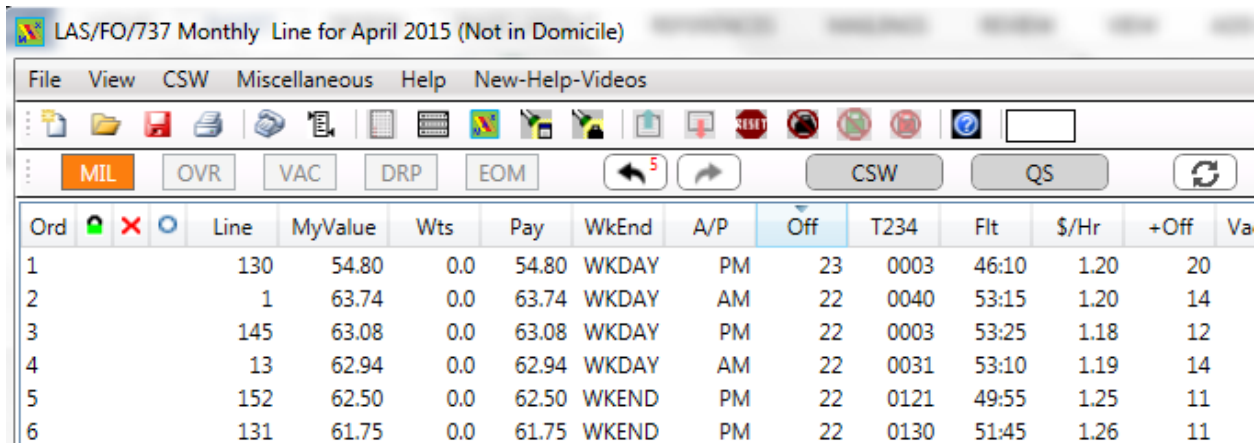

Shown below is a column sort on Max Pay.

The screenshot shows the WBidMax software interface. The title bar reads "LAS/FO/737 Monthly Line for April 2015 (Not in Domicile)". The menu bar includes File, View, CSW, Miscellaneous, Help, and New-Help-Videos. The toolbar contains various icons for file operations and a search box. Below the toolbar, there are buttons for MIL, OVR, VAC, DRP, EOM, CSW, and QS. The main data table is sorted by the "Pay" column. The table has 15 columns: Ord, Line, MyValue, Wts, Pay, WkEnd, A/P, Off, T234, Flt, \$/Hr, +Off, and Va. The data is as follows:

Ord	Line	MyValue	Wts	Pay	WkEnd	A/P	Off	T234	Flt	\$/Hr	+Off	Va
1	266	103.27	0.0	103.27	WKEND	PM	16	0103	84:55	1.22	6	
2	274	98.27	0.0	98.27	WKEND	PM	16	0022	79:20	1.24	5	
3	215	98.17	0.0	98.17	WKEND	PM	17	0013	83:35	1.17	8	
4	275	97.85	0.0	97.85	WKEND	PM	16	0221	81:55	1.19	5	
5	135	97.58	0.0	97.58	WKEND	PM	18	0103	82:30	1.18	8	

Shown below is a column sort on days off.

The screenshot shows the WBidMax software interface with the "Off" column sorted. The title bar and menu bar are the same as the previous screenshot. The toolbar and buttons are also the same. The main data table is sorted by the "Off" column. The table has 15 columns: Ord, Line, MyValue, Wts, Pay, WkEnd, A/P, Off, T234, Flt, \$/Hr, +Off, and Va. The data is as follows:

Ord	Line	MyValue	Wts	Pay	WkEnd	A/P	Off	T234	Flt	\$/Hr	+Off	Va
1	130	54.80	0.0	54.80	WKDAY	PM	23	0003	46:10	1.20	20	
2	1	63.74	0.0	63.74	WKDAY	AM	22	0040	53:15	1.20	14	
3	145	63.08	0.0	63.08	WKDAY	PM	22	0003	53:25	1.18	12	
4	13	62.94	0.0	62.94	WKDAY	AM	22	0031	53:10	1.19	14	
5	152	62.50	0.0	62.50	WKEND	PM	22	0121	49:55	1.25	11	
6	131	61.75	0.0	61.75	WKEND	PM	22	0130	51:45	1.26	11	

Basically, you can now bid as you usually do for the month and incorporate your planned military leaves of absence.

**NOTE: you cannot incorporate month to month overlap (OVR), vacation corrections (VAC), or EOM.**

The intricacies of incorporating MIL leave with OVR or VAC or EOM is far too complex, without clear contractual guidelines. This means, if you want to view the military corrections, you cannot also do OVR, VAC or EOM.

### **iPad NOTE for the MIL Button**

Since we have to get approval from Apple for every new version, by the 20<sup>th</sup> of the month, we are submitting to Apple the latest version of WBidMax for iPad. The most current version of WBidMax for iPad is 1.9.1.

Unfortunately, we found a problem with the MIL button in the iPad version. For some lines, it will not correctly calculate for a one day MILOA. Version 5 and the Mac version will calculate correctly.

Additionally, this is a complex new feature, so if you are using the feature and it does not appear correct, please send an email to [support@wbidmax.com](mailto:support@wbidmax.com) with details and maybe a screen shot.
